

NAME

`sjisconv` – convert a TeX document in SJIS encoding into ‘preprocessed’ form.

SYNOPSIS

`sjisconv <infile> >outfile`

DESCRIPTION

SJIS encoding for Japanese uses the characters {, }, and \ which have special meanings in T_EX documents.

After processing a L^AT_EX 2_ε document which contains SJIS characters with `sjisconv` you need not care about these special characters.

This filter is part of the **CJK** macro package for L^AT_EX 2_ε.

SEE ALSO

`bg5conv(1)`, `cefconv(1)`, `cef5conv(1)`, `cefsconv(1)`, `extconv(1)`,
the **CJK** documentation files.
