GNU Texinfo Reference Card

@env {

@ifnotdocbook @ifnothtml @ifnotplaintext @ifnottex @ifnotxml ...**@end ifnot**format Begin text to be ignored in one output format but no others: **@ifnothtml** text is omitted from HTML output, etc.

@ifnotinfo ...**@end ifnotinfo** Like the other **@ifnot**... commands, but omit from plain text output as well as Info.

@inlinefmt {format, text} Include Texinfo text only in format output.

Raw formatter text

@docbook ...**@end docbook** Enter Docbook completely.

@html ...**@end html** Enter HTML completely.

@tex ...**@end tex** Enter T$_E$X completely (e.g., \ becomes an escape character).

@xml ...**@end xml** Enter XML completely.
