

`bxdpx-beamer` Package

=====

LaTeX: to fix some problems in use of Beamer with dvipdfmx

This packages makes the two types of links work:

- Navigation symbols
- `\framezoom`'d regions

Installation

- `'*.sty'` `$TEXMF/tex/latex/bxdpx-beamer`

Usage

Load this package as usual in the preamble of Beamer documents:

```
\documentclass[dvipdfmx]{beamer}
\usepackage{bxdpx-beamer}
```

This package does not provide any user commands.

Revision History

- * Version 0.2 <2013/02/27>
 - The first public version.
